

Supplementary Information to accompany
“Types of Labor Market Policy and the Electoral Behavior of Insecure Workers”

Contents

Appendix A	Data Source	A3
Appendix B	Summary Statistics	A4
Appendix C	Effects of Unemployment and Fixed Job Contracts on Vote Choices	A5
Appendix D	Conditional Effects of Unemployment Insurance	A7
Appendix E	Conditional Effects of Active Labor Market Policy	A11
Appendix F	Reanalysis without Control Variables	A15
Appendix G	Reanalysis Controlling for Long-term Unemployment Rates	A19
Appendix H	Reanalysis using Support for Green Parties as a Dependent Variable	A23
Appendix I	Reanalysis using Unweighted UI and ALMP Expenditures (% of GDP)	A24

A Data Source

	Variable	Data Source
Micro-level variables	Vote choices	European Social Survey (ESS) module 1-7
	Unemployment	ESS module 1-7
	Temporary Work	ESS module 1-7
	Age	ESS module 1-7
	Female	ESS module 1-7
	Education	ESS module 1-7
	Union membership	ESS module 1-7
	Household income	ESS module 1-7
	Political ideology	ESS module 1-7
	Religiosity	ESS module 1-7
Macro-level variables	Economic Growth	Annual GDP growth. Data from OECD Stats
	Employment protection strictness	OECD Indicators of Employment Protection 1985-2013.
	Governing partisanship	Database for Political Institutions (DPI) (2015) (Thorsten et al. 2001)
	Active labor market programs	Gov't spending on the active labor market program as % of the national GDP weighted by unemployed population (OECD Social Expenditure Database (SOCX))
	Unemployment insurance	Gov't spending on unemployment insurance as % of the national GDP weighted by unemployed population (OECD SOCX)
	Post-crisis	If a survey year is after the 2008 financial crisis, coded as 1, otherwise 0.

B Summary Statistics

Table 4: Summary statistics

Variable	Obs.	Mean	Std. Dev.	Min.	Max.
All left	163684	.31	.462	0	1
Old left	163684	.229	.42	0	1
Radical left	163684	.054	.225	0	1
Nationalist	163684	.03	.172	0	1
Lib./cons	163684	.317	.465	0	1
Abstention	163684	.184	.387	0	1
Unemployed	163684	.042	.2	0	1
Temporary workers	114297	.162	.368	0	1
Age	163019	1.971	17.65	-33.788	75.212
Female	163561	.529	.499	0	1
Education	163100	3.038	1.437	1	5
Union member	161101	.26	.439	0	1
Income	128151	6.016	2.678	1	12
Political ideology	146857	5.072	2.074	0	10
Religiosity	162781	4.717	2.926	0	10
Weighted UI spending	163684	0	.123	-.163	.448
Weighted ALMP spending	163684	0	.089	-.126	.293
GDP growth	163684	.154	2.578	-7.254	6.805
Employment protection legislation	160504	0.2	.791	-1.146	2.239
Left government	163684	.48	.5	0	1
Post-crisis	163684	.445	.497	0	1

Notes: All continuous predictors are mean-centered.

F Reanalysis without Control Variables

Figure 6: Conditional Effect of Unemployment over Varying Degrees of Government Spending on Unemployment Insurance

Note: Dash lines present 95% confidence intervals. Figures are based on reanalyses presented in Model 2, 4, and 6 in Table 7 without control variables.

Figure 7: Conditional Effect of a Temporary Contract over Varying Degrees of Government Spending on Unemployment Insurance

Note: Dash lines present 95% confidence intervals. Figures are based on reanalyses presented in Model 2, 4, and 6 in Table 8 without control variables.

Figure 8: Conditional Effect of Unemployment over Varying Degrees of Government Spending on ALMP

Note: Dash lines present 95% confidence intervals. Figures are based on reanalyses presented in Model 2, 4, and 6 in Table 9 without control variables.

Figure 9: Conditional Effect of a Temporary Contract over Varying Degrees of Government Spending on ALMP

Note: Dash lines present 95% confidence intervals. Figures are based on reanalyses presented in Model 2, 4, and 6 in Table 10 without control variables.
